GE's "Evolution" Series returns to the Scene!

GE's ES44AC "GEVO" series of locomotives will be getting a new release from Kato USA this coming spring - with restocks with new road numbers coming in all of the most popular paint schemes!

The Kato ES44AC is built on the same bullet-proof chassis that has powered the SD70MAC, C44-9W and AC4400CW locomotives, making it a reliable and powerful addition to any modern freight layout!

Also accompanying the new ES44AC Releases will be a brand new series of Bethgon Coalporter 8-Car Sets, perfect for pairing up with these heavy-hauling diesels. Each set contains 8 individually numbered coal cars with removable coal loads, allowing them to be run empty or full!
