KATO
PRECISION RAILROAD MODELS

VINTAGE AMTRAK®

RELEASED JULY 1ST

Bring the early days of Amtrak to your home layout! The Amfleet® I, like the EMD SDP40F, was one of Amtrak's first purchases of new equipment built especially for the new and growing passenger service. Now for the first time, the N Scale Amfleet I is available from Kato in Amtrak's Phase I paint - a perfect pairing with the new SDP40F or the Amtrak or Penn Central GG1 Locomotives!

The new Amfleet I Phase I release comes packaged in a book style case as well as in two-packs; modelers who wish to bundle their sets as a complete train can remove the foam inserts from the bookcase to add space for a locomotive and two additional Amfleet cars!
