

Kato's ACe in the hole

EMD SD70ACe

- New Body tooling with isolated cab and nose mounted headlights.
- The appearance of these SD70ACe locomotives is a match for the "Tier 4 Credit" engines built post-2014.

These SD70ACe's are a *credit* to their design!

New for 2018, Kato is refreshing its tried-and-true SD70ACe design with a new tooling variation! These Tier-4 "Credit" engines (technically not Tier 4 compliant, but allowed manufacture due to UP's purchase of actual Tier 4 engines) are the latest iteration of the SD70ACe design, with new molded features like the isolated "comfort cab" design and the new nose headlights. These new SD70ACe engines are available now from your local hobby store both as Standard Analog (DC) units as well as with available DCC and even DCC & Sound! (Sound is available on a special order basis). Get yours today!

STANDARD DC VERSIONS AVAILABLE DECEMBER
